Commercial Industrial Roofing * Relationships * Leadership

Tecta America is a National Roofing Contractor, a corporation of merged roofing contractors from all corners of the USA formed into one. Tecta handles maintenance of all roof types and reroofing projects, as well as installation of new roofs. Tecta is certified with all major manufacturers.

They provide annual roof inspections, and manufacturer's warranty maintenance, emergency service, and pre and post storm services.

Denise has been in business development and servicing accounts in commercial roofing since 2008, after many years in similar positions in other industries. Denise loves to work and meet with building owners, developers, architects and property managers. Matching the correct roofing for the project, and focusing on longevity, easy maintenance and safety for the building and weather conditions, are all considered for each project.

As is a newer member of CREW NJ, Denise is impressed by the comradery and interest members take in one another. She enjoys meeting other commercial professionals, networking and supporting their business. Denise would like to make an impact in CREW, and help us grow to our potential, and would one day like to be president of our chapter.

As a member of the Golf Committee, Denise is providing the car for our hole in one this year, donated by Acura DCH.

Denise is also an event planner and floral designer who likes to work part-time designing fresh and dry floral arrangements. She is also a part owner of a dirt race track car.
